

IBC/IRC CODE UPDATES SEMINAR

COURSE DESCRIPTION

This seminar reviews the significant changes from the 2006 to the 2009 International Building and Residential Codes. The course will discuss the background behind many of the code changes and it will identify the important changes in organization and code requirements. Participants will gain an understanding how these requirements apply to design, plan review and inspection. Subjects covered in the class will include the code change process, mixed occupancies, atriums, accessible means of egress and many more.

PRESENTER: Steve Thomas, CBO

Steve brings more than 30 years of experience to the table in code administration and construction industries. He is professionally certified by ICC and FEMA. He is a member of multiple professional organizations including Colorado Chapter of the International Conference of Building Officials where he served as President and the international Code Council (ICC) where he currently serves as Vice Chairman of the IBC Means of Egress code development committee.
