Light Gauge Metal Framing Seminar

DESCRIPTION.

This seminar will provide an in-depth analysis of the four major ASTM standards that govern the manufacture and installation requirements of interior and exterior steel framing members. It will also examine commonly specified fire-rated partitions with a focus on applicable solutions when problems arise.

OBJECTIVES.

- What ASTM standards govern the manufacture and physical requirements of light gauge metal framing studs.
- What are the minimum installation requirements for studs as established by ASTM C754 and C1007.
- What you need to know when specifying or inspecting fire-rated partitions.

PRESENTER.

Steve Dubin, CSI will present this course. Steve has been with Dietrich for eight years in various sales and marketing roles. He is a member of CSI and the Western Washington Chapter of ICC, and a highly respected consultant in the industry of metal framing.

TARGET AUDIENCE.

Building Inspectors, Building Plan Reviewers, Architects, Engineers and other Design Professionals.

COST. FREE. Space is limited to 50 people.

DATE, TIME & LOCATION. September 23, 2009. 9:00 a.m. to 12:00 noon. [Renton City Hall](#),
1055 S Grady Way, Renton WA 98057
